Best Practices: II

Title of the Practice: Cyber Security Awareness Week

Objectives of the practice:

- ✓ To create cyber awareness among the fellow citizens and to create a safer and secure digital world.
- ✓ The objective is to support them in obtaining the skills and knowledge required to work, and knowing when to raise any concerns

The Context:

What does it mean to stay safe online in 2022? So much of what we do in our personal and professional lives occurs over the Internet, and rarely do we think about the information security threats that we face. Yet, it's something that we absolutely must do. An effective awareness program should complement the way people work rather creating rules that hinder ability to get their jobs done. The objective is to support them in obtaining the skills and knowledge required to work, and knowing when to raise any concerns.

Evidence of Success:

- ✓ Apply critical thinking and problem-solving skills to detect current and future attacks on an organization's computer systems and networks.
- ✓ Effectively communicate in a professional setting to address information security issues.
