### Best Practice – I

#### 1. Title of the Practice: - Incubation Cell

The incubation Cell (IC) addresses development of product/Services using upcoming technologies in the institute which is incubated by budding developers who are the students of ICCS. The head of Incubation Cell of the Institute appraises each incubation proposal and the business plan based on pre-defined criteria. All the funding for the projects in incubation center are taken care of by the management. The activities in the IC include product development, product innovations, software testing, simulation and prototyping, pilot experimentation, along with our major ongoing project of Virtual Reality.

Permitted activities in the IC include product development, product innovations, software testing, simulation and prototyping, pilot experimentation, training and similar other technology-related work.

One of our major ongoing projects in Virtual Reality. In social sciences and psychology, virtual reality offers a cost-effective tool to study and replicate interactions in a controlled environment. Such an environment can be utilized in CBSE Schools.

VR simulates real spaces for workplace occupational safety and health purposes, educational purposes, and training purposes. It can be used to provide learners with a virtual environment where they can develop their skills without the real-world consequences of failing.

#### 2. Key objectives: -

- Provide a platform to the students of ICCS, to think out of the box so that their ideas toward certain problem solutions are appraised.
- To encourage the students by funding such appraised projects.
- To promote new product development, product innovations, software testing, simulation and prototyping, pilot experimentation, training and similar other technology-related work.
